Goal
To provide information on injury prevention and the pre-hospital, emergent, and critical care of the trauma patient. Although the content focus is primarily for pre-hospital providers, nurses, physician extenders, and physicians may enhance their knowledge base on the subject matter provided.

Objectives
At the conclusion of this symposium, the participant will be able to:
a. describe how children differ from adults regarding spinal trauma and assessment;
b. discuss general standards of burn care with age-specific modifications for the pediatric patients;
c. outline documentation risks specific to health care emergency care;
d. recognize maltreatment evidence collection opportunities both in the field and hospital;
e. understand the role mechanism and kinematics play in traumatic injuries.
